

# Decked Pontoons

## Datasheet

Wardle Marine Services Ltd

Decked Pontoons are designed and manufactured to the customer's exact requirements with a wide range of options available.

We can manufacture the pontoons in virtually any shape or size from small floating platforms for private use to complete systems for marina's or as flotation for marine engineering equipment.

Our decked pontoons can be used for a wide variety of applications and we offer a number of variants to ensure that your pontoon exceeds your expectations.

Based on either our Modular Cube or Ez Dock flotation systems we have a range of decking support frames available depending on your application and budget.

We then add a deck covering of your choice.

Customise your pontoon by adding finishing touches such as hand rails, steps, lights, and services as required.

We can also CNC route names/logo's/berth numbers into the pontoon deck for the ultimate custom look.

The pontoons and frameworks can also be used to support a wide range of marine engineering equipment. Customised frameworks can be built to fulfil your project requirements.
