

## Jet Ski Ports

We offer a few different jetports to accommodate your personal requirements. They respond to changing water levels, protecting your ski against damage from consistent exposure to wind and waves. The design allows the water to swiftly drain the surface, and they can easily be attached to a variety of accessories, enabling you to create your own custom space in the sea, lakes and rivers.

### Jetport

386cm x 147cm x 38cm

The Jetport has fixed wheels and rollers, making it the easiest to install. All Jetports can be attached to one another as well as other Rotodock and Cube modules, enabling your port to grow as your collection does.

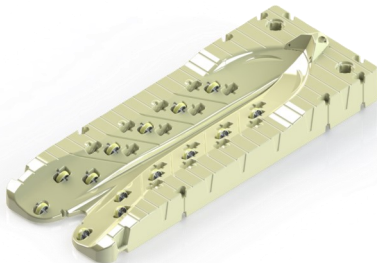

### Jetport Plus

386cm x 147cm x 38cm

The Plus model has detachable wheels and rollers enabling you to arrange the port according to your ski's model. This design gives

better rigidity and distribution of load on the base.

### Jetport Max

386cm x 196cm x 38cm

The Max has an extra 50cm width to it, corrosion free rollers, and UV stabilizers.

It is virtually maintenance free and will provide years of service.
